SOFTWARE DEVELOPER | JAVA, PYTHON, SQL, REST APIs & AWS

SUMMARY

Software Developer with hands-on experience building backend services, REST APIs, secure applications, and cloud-deployed business systems using Java, Spring Boot, Python, SQL, AWS, Docker, and CI/CD. Experienced with relational databases, authentication, unit and integration testing, troubleshooting, production deployment, object-oriented programming, and secure coding practices. Interested in contributing to reliable enterprise AI services and cloud-native engineering.

TECHNICAL SKILLS

Languages: Python, Java, SQL, TypeScript, JavaScript, HTML5, CSS3
Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, Maven
Databases/Cloud: MySQL, Amazon RDS for MySQL, AWS Elastic Beanstalk, S3, CloudFront, Route 53, ACM, Docker, GitHub Actions, CI/CD
Testing/Security: JUnit, Mockito, Unit Testing, Integration Testing, JWT, BCrypt, Role-Based Access Control, Password Reset Tokens
Frontend/Tools: Angular, Bootstrap, Responsive Web Design, Git, GitHub, npm, MySQL Workbench

WORK EXPERIENCE

UI Programmer | Crystallized Games Inc.

Mar 2026 – Apr 2026

- Developed modular UI systems in Unreal Engine using C++, Blueprints and object-oriented programming principles.
- Built documented gameplay interface code within Agile sprint cycles and collaborated during sprint planning, stand-ups, reviews and implementation discussions.
- Used Perforce-based branch workflows to manage version control and support team development.

Full-Stack Developer | Grace Rubber Bands and Eco Products and Exports

June 2022 – July 2024

- Developed and maintained business application features for customer enquiries, products, quotations, orders, invoices and wholesale sales workflows under the guidance of a senior developer.
- Built and updated frontend and backend functionality using Angular, Java, Spring Boot, REST APIs, SQL and MySQL.
- Assisted with database design, API integration, form validation, authentication workflows and role-based access features.
- Worked with business stakeholders and a senior developer to understand requirements, troubleshoot issues and improve internal order-management and customer communication processes.
- Supported testing, bug fixing, deployment validation, and documentation for business workflows across customer, product, quotation, order, and invoice modules.

FREELANCE EXPERIENCE

Full-Stack Developer | MJAV Rubber Bands

May 2025 – Present

- Developed and deployed a full-stack B2B wholesale platform using Angular, TypeScript, Java, Spring Boot, Spring Security, and MySQL.
- Designed REST APIs and relational database workflows for products, customers, enquiries, quotations, orders, invoices, users, reports and support requests.
- Implemented JWT authentication, BCrypt password hashing, password-reset tokens, account approval, and role-based access for Admin, Customer and Staff users.
- Built customer and administrator workflows covering registration, product discovery, quotations, order tracking, invoices, reports and support requests.
- Deployed the application using Amazon RDS, Elastic Beanstalk, S3, CloudFront, Route 53 and ACM with a custom HTTPS domain.
- Automated testing and deployment using GitHub Actions, Docker, AWS OIDC, JUnit, Mockito and Maven.

EDUCATION

Game Design | Graduated with Distinction

Conestoga College – Kitchener, ON, Canada

Sep 2024 – Apr 2026

Bachelor's Degree in Animation and Graphic Design

Madurai Kamaraj University – Tamil Nadu, India

Jun 2019 – Mar 2022
